Become part of a dynamic and supportive network of fellows, eco-pioneers and mentors

Connect with many great thinkers and doers in the field

Bhoomi is grateful to all our guest faculty members, some of whom are represented here.
Bhoomi Fellowship in Sustainable Living

- Are you looking for avenues of work that foster sustainable living?
- Do you yearn for fulfilling work that heightens your understanding of real-life issues of Earth care?
- Are you seeking experiences and knowledge that integrate head, heart and hands; that connects science, humanities and management?

If any of these questions are yours too, then Bhoomi’s 10-month Fellowship Programme in Sustainable Living will be valuable for your journey.

It can help you become a green / social entrepreneur or take up work concerning food systems, renewable energy, eco-design, organic farming, and ecological economics.

The programme helped me gain holistic perspectives and make connections between the macro and micro elements. It gave me a clear sense of direction, deeper confidence and a strengthening of resolve. I could then move ahead on the path of my choice to work on building resilient villages around Mumbai.

Madhavi Rane
Sustainable Living Fellow, 2017-18

My time at Bhoomi has helped me anchor deeply in my conviction to work in the space of regenerating forests. Today, I work towards bringing back native Himalayan forests and also facilitate programmes for youth in the region.

Manvendra Singh
Sustainable Living Fellow, 2012-13

The Programme starts on 10th July 2020

Maximum number of fellows accepted: 25

Eligibility: Bachelor’s degree in any discipline / good knowledge of English and strong interest in one or more aspects of sustainable living; minimum age: 22 years. In special cases, this requirement can be waived.

To apply: write to Director, Programmes, bhoomicollege@gmail.com or log onto: www.bhoomicollege.org and fill up the application form online.
If your search is for meaningful ways to inspire children, to understand teaching / learning processes based on nature’s principles and to live wisely on planet earth, then this programme is for you.

Fellowship Programme fosters a transformational process that enables a person to become an effective facilitator in progressive schools and colleges or a non-formal educational entrepreneur.

It focuses on rethinking education and supports holistic thinking and learning methods such as - Active Learning, Emergent Curriculum and Nature Based Learning etc. The fellows get the opportunity to learn experientially through classroom observation, field trips, book reviews, group discussions and interacting with highly experienced and creative facilitators. This programme is offered with support from Prakriya Green Wisdom School which is located in the same campus.

Bhoomi has been a nurturing force, it has enabled me to get in touch with my deeper self. The programme helped me understand the child as a whole and create spaces for children to experience themselves completely. As a high school facilitator in Prakriya now, my understanding has deepened, of schools being spaces for not only intellectual growth but also emotional, spiritual and practical learning.

Suhasini Pandey
Holistic Education Fellow, 2018-19

The Programme starts on
10th July 2020
